Version 1.0

The main purpose of this document is to give everyone a price GUIDE as to what we feel current prices are. We also desire to document as much as possible, all known color/style of lamps.

### **Rarity scale:**

**1** - numerous ones available. Tendency not to buy when seen in store.

**2** - available, but limited qty.

**3** - 1 to 3 known

NK - none known.

### **Colors:**

All lamps can come in amber/blue/green/clear.

Thumbprint stand ONLY has been found in some off green and blue colors.

Just like amber signals/beehives, amber lamps can be found in shades from yellow to dark amber.

I have seen nuked purple lamps, but also some beautiful sun colored purples similar to hemi 9s.

Footed finger lamps can come with 3 bases. Trumpet stem, drip catcher, dogtooth.

As always, price is subjective. If you have two or more bidders on eBay that really want it....

Also recall two green stand lamps appeared in Ksmith auction several years ago that sold for \$1,500 each. Three times the current value.
